# Info Insert Extreme

Provides users with the ability to quickly and easily insert advanced properties from HPE Content Manager into new and existing Microsoft Word documents.

## Features

---

### Increase Your Speed

The FYB Info Insert Extreme enables users to quickly and easily insert advanced properties from HPE Content Manager into new and existing Microsoft Word documents at the click of a button.

### Insert Everything

This is a simple and effective tool that allows you to:

- Insert your digital signature into the document
- Insert document properties into your document including; record number, document title, related records and web URL
- Insert contact properties into your document including; author name and mailing details, addressee name and mailing details and creator details
- Insert container properties for your document including the record number
- Insert document security properties including; access controls, security caveats, security levels and security classification.

### Fits In Easy

The FYB Info Insert Extreme is a Task Pane addition to your Microsoft applications and works in conjunction with the HPE Content Manager ribbon to bring you a fully integrated solution.

## Benefits

---

1. Electronic signatures can be inserted into the document saving time in printing and physical signing.
2. Scanning process made more efficient by utilising the barcode feature in conjunction with scanning software such as EzeScan.
3. Date and Location format client can be chosen prior to insertion meaning users are not required to manually edit the data from these fields.
